

# CORPORATE AMERICA

*You are a corporation. Not a CEO, a corporation. (They're people too.)  
You will start businesses to make money. You will influence the other players.  
You will manipulate the American people and government.  
You will do what corporations do best: maximize profits.*

Start businesses and **monopolize industries.**

**Bribe** the other players and **manipulate consumers** to determine who gets rich.

Become **president** to decide which laws the government passes. It takes **charisma, cunning,** and of course **deep pockets,** but winning gives you **power and influence.**

...unless **protesters** get in the way.

**Corporate America** has the **depth** of a **strategy game** with the **lively atmosphere** of a **party game.** You and your friends will **scheme,** you'll **debate,** and you'll **laugh.** Whoever makes **the most money** wins.

In **Corporate America,** that's just **business as usual.**
